Hello Forest Roads and Landslide Team,

Attached is a tracking file which reflects comments in all categories to date. Please look through the landslide topic comments and associated citations and identify any comments or studies you feel we need to consider including in the draft landslide rationale I sent out yesterday. I will try to schedule a call for later this week to discuss the landslide rationale in preparation for our briefing to the management team on August 14th.

I hope to get the draft roads rationale out to you later this week and I hope you'll be able to review it in light of the tracking file per above. I will be on Ex. 6 - Personal Privacy all of next week and back in the office on August 12th, so I plan to schedule another call for our team to discuss the roads piece on either on the 12th or 13th depending upon availability.

Please let me know if you have any questions or concerns.

Thanks.

Chris Solloway

Subject: OR CZARA Review Files

Hello all,

Attached please find a copy of the tracking file, which has been updated and completed for the forest roads references. Any incomplete or pending items from the review are noted in the attached word document (organized by category). Also attached is a summary of the status call on 7/23/14 – please let me know if you have any comments and I can revise accordingly.

If any of you have or know where we can find the missing documents, or can help to address any of the other loose ends, please let us know and we will review them to finish up the review to date. Otherwise, we will wrap up some additional reviews for Chris and then await further direction from Jayne.

We also have the 269 references obtained to date on our SharePoint site (Non-Responsive Non-Responsive). I can zip these and distribute via a download link or send a DVD. Please let me know if you would like copies of these now (and the preferred distribution method) or if you would rather we wait to ensure everything is complete.

Thanks, Amy
